

# SECURE CLOUD VIEWING

PageWrx™ can be used to stream documents to multiple devices for high quality viewing.

## ACCESS DOCUMENTS, ANYWHERE

PageWrx™ is a revolutionary viewing solution. Based on technology deployed on over 800 million devices, it offers a unique cloud-based viewing experience on your users' desktop or mobile devices. Allow your users to quickly view documents without the need to download the original file – store and view securely.

*Distribute safe and controlled document viewing capabilities across multiple OS platforms and devices*

*Quickly and easily integrate into existing solutions*

## SECURE DOCUMENT VIEWING

PageWrx™ can deliver a secure document viewing environment for enterprise.

Users have the flexibility to limit and share documents internally and externally safe in the knowledge that the original document can not be replicated or abused.

PageWrx™ can be integrated with an enterprise's existing servers, providing complete security and control when deployment model is implemented.

## DIFFERENTIATE WITH AN INNOVATIVE VIEWING EXPERIENCE

PageWrx™ is a leading cloud file viewer that generates images of each page of a document (Microsoft® Word, Excel, PowerPoint, PDF and many other file types), allowing users to quickly view in a custom application or a web browser, removing the need to download the original file.

## AN ENHANCED CLOUD STORAGE EXPERIENCE

PageWrx™ technology offers a number of key benefits:

- Users can control the distribution and viewing of their documents.
- Preview full documents on a stored on a server.
- Users can view Microsoft® Office documents, PDFs and images without the need to run local desktop or mobile office software.
- PageWrx™ can be integrated with any website or mobile application.
- Add a custom watermark to served bitmaps.
- DPI of image chosen by the server.

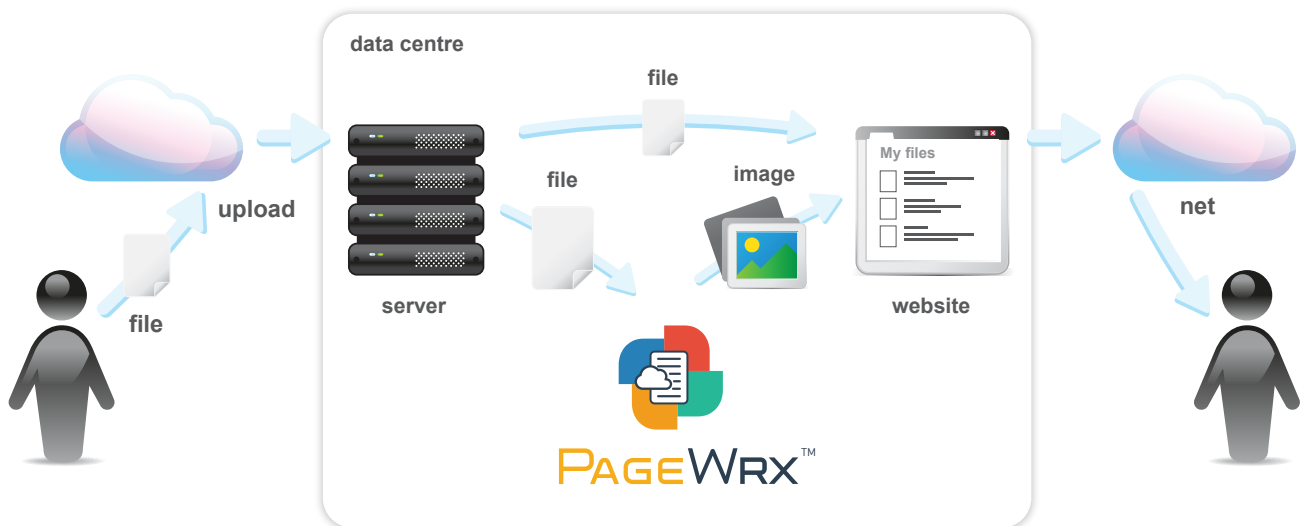

## CUSTOMISABLE SOLUTIONS

ENTWRX understands the need to provide users with a high quality experience. PageWrX™ is delivered as a software development kit, which enables you to rapidly rebrand PageWrX™ and seamlessly integrated it with your existing services.

## EXAMPLE WORKFLOW

PageWrX™ resides in a remote server, could be on a device. A document is loaded by PageWrX™ then rendered and served as a non-editable image.

### SERVER-SIDE

## KEY PERFORMANCE INDICATORS

- 80 milliseconds to render the first page of a document at 50 dpi, typically.
- About 40,000 documents per hour. Depends on document content and machine.
- Supports the same faithful page layout as the OfficeWrX™ application.
