

SECURITY AT ITS HEART

SecureWrx™ is the most secure enterprise document workflow solution available.

SECUREWRX™ is a fully featured mobile office suite for smartphones and tablets. A single application per OS platform enables access to benchmark viewing, printing sharing and presenting capabilities on mobile devices across multiple platforms.

Engage in a rich user experience, that is platform-independent and brings consistency to any fleet.

Distribute safe and controlled document editing capabilities across multiple OS platforms and devices.

MULTI PLATFORM, MULTI DEVICE

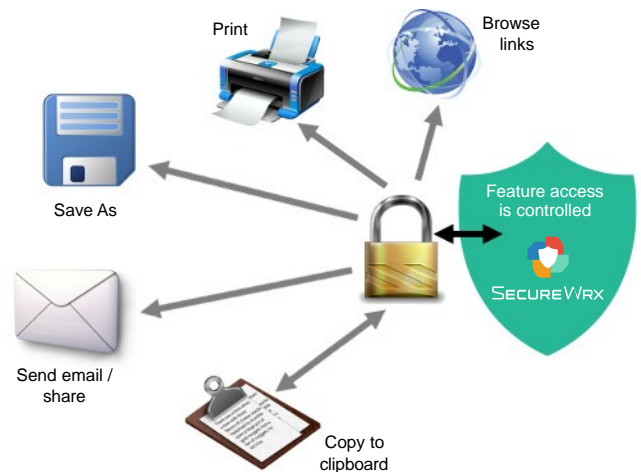

SecureWrx™ enables IT departments to distribute safe and controlled document capabilities to employees who bring their own devices.

SECURITY, CUSTOMISED FOR CORPORATE POLICY

Enterprise IT departments can prevent data leakage by granting access permissions on a per-user basis to any document stored on a secure server. Controlled access permissions include:

Restrict emailing of files, clipboard access (restrict copy/paste to other documents), save as, printing, and many other features which could potentially be abused by employees.

Enterprises can serve non-editable versions of documents, which allow the user to view without compromising security.

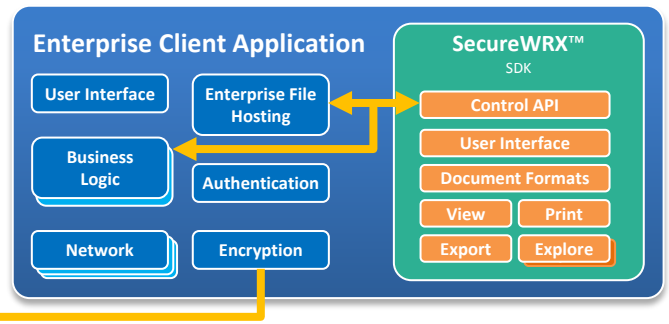

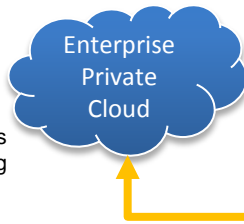

SEEING IS BELIEVING. Request a demonstration today.

INTEGRATION THAT IS FAST, SIMPLE AND DRIVES EFFICIENCIES

Have a solution in place within days rather than months while maintaining expectations of usability and security.

SecureWRx™ can be fully integrated with your MDM / MAM environment, requiring only one integration per platform. For example, one library is suitable for all versions of Android (2.0+). SecureWRx™ intelligently adapts to the device, whether smartphone or tablet.

SECURITY FEATURE/SERVICE	BENEFIT
Access encrypted files through a secure container	Not vulnerable to malware / hacking / theft
Control access to corporate documents	Enforce IT policies and compliance on a 'need-to-know' basis
Prevent data leakage to clipboard, email, printing	Content stays inside the secured perimeter
